Wichita Metro Area Leading Economic Indicators Index Results for January 2012

Introduction

The WSU Leading Economic Indicators Index is designed to give an indication of where the Wichita economy is headed. Leading indicators tend to change before the economy itself changes. The WSU Leading Economic Indicators Index is composed of nine monthly indicators including:

- Kansas monthly initial claims for unemployment insurance
- Value of building permits, new residential construction
- Value of building permits, new non-residential construction
- National Index of Consumer Confidence
- Average weekly hours worked in manufacturing
- New orders for aircraft
- Stock prices of aerospace companies
- Wheat prices (futures) and
- The Conference Board's national index of leading economic indicators

The WSU Current Conditions Index is designed to reflect the present state of the economy. The WSU Leading Economic Indicators Index, on the other hand, is designed to forecast future movements in the economy. On the national level, The Conference Board releases the most widely followed indicators. The WSU Current Conditions Index is similar to what The Conference Board refers to as their "coincident" indicators index. Likewise the WSU Leading Economic Indicators Index is similar to The Conference Board's Leading Economic Indicators Index.

The WSU Leading Economic Indicators Index may be examined over time to determine the likely future course of the Wichita economy. An increase in the Index over several months signals an expansion in the Wichita economy approximately six months into the future. Similarly, a decline in the Index over several months signals that the area economy is likely to weaken in approximately six months. A movement in the Index in only one month does not produce a clear signal. This interpretation of movements in the Index is similar to that which The Conference Board gives to its national Index of Leading Economic Indicators, in which a change in the Index must take place for at least three months in a row for a change in the economy to be signaled.

Summary of Results

Month-to-Month Comparisons: December 2011 to January 2012

- The Leading Economic Indicators Index decreased 0.1 percent
- Kansas initial unemployment claims decreased 32.2 percent
- Value of new residential construction permits decreased 1 percent
- Value of new non-residential construction permits increased 202.8 percent
- National Index of Consumer Confidence decreased 3.3 Index points
- Average hours worked per week in manufacturing increased 0.5 percent
- Value of new orders for aircraft and parts decreased 16.4 percent.
- Aerospace stock index increased 4.9 percent.
- Wheat price increased 7 percent
- The Conference Board's Index of Leading Economic Indicators increased 0.4 Index points

Year-Over-Year Monthly Comparisons: January 2011 to January 2012

- The Leading Economic Indicators Index increased 4.3 percent
- Kansas initial unemployment claims decreased 49.8 percent
- Value of new residential construction permits increased 90.3 percent
- Value of new non-residential construction permits decreased 61 percent
- National Index of Consumer Confidence decreased 3.3 Index points
- Average hours worked per week in manufacturing increased 2.8 percent
- Value of new orders for aircraft and parts increased 56.7 percent.
- Aerospace stock index decreased 0.4 percent
- Wheat prices decreased 21.6 percent
- The Conference Board's Index of Leading Economic Indicators increased 3.1 Index points

Year-to-Year Comparisons: January 2011 to January 2012

(12 months ending January 2011 compared to the 12 months ending January 2012)

- The Leading Economic Indicators Index increased 9 percent
- Kansas initial unemployment claims decreased 15.3 percent
- Value of new residential construction permits increased 1.7 percent
- Value of new non-residential construction permits decreased 20.8 percent
- National Index of Consumer Confidence increased 2.7 Index points
- Average hours worked per week in manufacturing increased 2.9 percent
- Value of new orders for aircraft and parts increased 21.6 percent
- Aerospace stock index increased 1.7 percent
- Wheat prices increased 20.3 percent
- The Conference Board's Index of Leading Economic Indicators increased 3.1 Index points

Table 1. Leading Economic Indicators Index for January 2012

Month	Year	Index	Percentage Change
January	2011	97.41	1.4
February	2011	97.01	-0.4
March	2011	99.43	2.5
April	2011	100.12	0.7
May	2011	100.65	0.5
June	2011	100.76	0.1
July	2011	99.73	-1.0
August	2011	101.12	1.4
September	2011	100.67	-0.4
October	2011	100.56	-0.1
November	2011	100.83	0.3
December	2011	101.65	0.8
January	2012	101.56	-0.1
