

Industry Concentration and Performance

State of Kansas and Regions
2008-2012

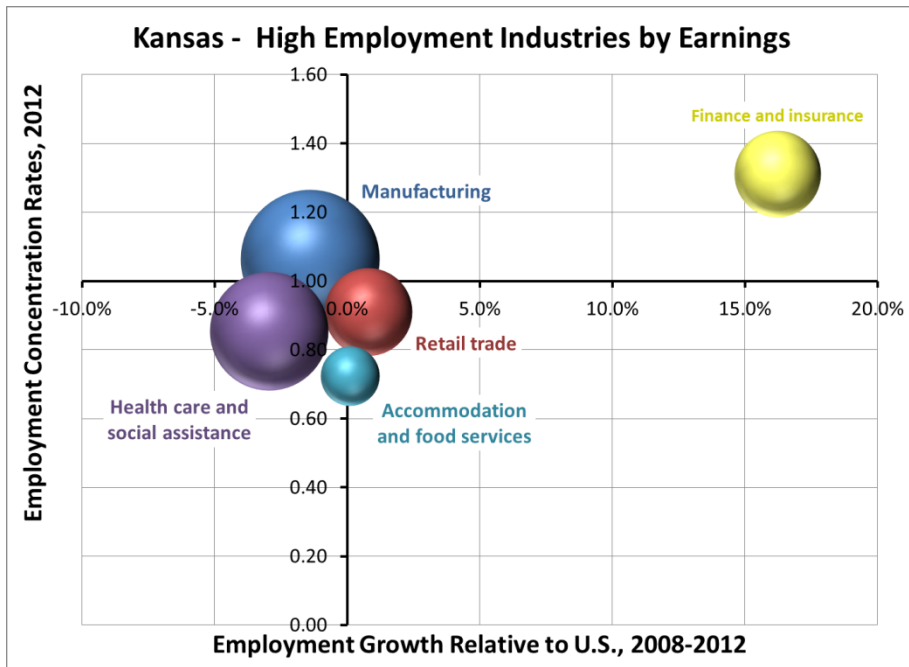

Introduction

The following presentation contains industry level employment data for the State of Kansas and its regions, from 2008 to 2012. The first section provides information on interpreting the data, followed by state level data, and then regional data.

INTERPRETING THE DATA

Interpreting the Data

For each region, data on the top five employment industries is included in a graph. Complete employment data for the region is provided in a table format.

Kansas	Employment		Change in Employment		Change Relative to U.S. 2008-2012	Location Quotient	
	2008	2012	Kansas	U.S.		2008	2012
Total employment	1,861,195	1,845,663	-0.83%	-2.27%	1.43%		
Farm	64,279	64,669	0.61%	6.56%	-5.95%	6.70	6.23
Mining	31,563	33,336	5.62%	10.74%	-5.12%	3.36	3.16
Construction	98,470	85,271	-13.40%	-22.08%	8.67%	1.01	1.11
Manufacturing	193,137	169,114	-12.44%	-11.03%	-1.41%	1.10	1.06
Wholesale trade	67,828	64,612	-4.74%	-5.39%	0.64%	0.86	0.85
Retail trade	186,531	182,011	-2.42%	-3.21%	0.79%	0.92	0.91
Transportation and warehousing	58,577	59,117	0.92%	-2.76%	3.69%	0.98	1.00
Information	42,913	32,128	-25.13%	-9.94%	-15.20%	1.09	0.89

Numbers may not sum to total due to data suppression and rounding. Location quotients greater than or equal to 1.20 indicate specialization

Interpreting the Graph

- Bubbles represent the five industries in the region with the highest level of employment.
- The size of the bubble represents the relative earnings between the five industries.
- The location of the bubble on the graph indicates the concentration and performance of the regional industry relative to the U.S.
 - The upper right quadrant may include industries that are contracting, but performing relatively better regionally than nationally.

Kansas - High Employment Industries by Earnings

Employment Concentration Rates, 2012

Employment Growth Relative to U.S., 2008-2012

Interpreting the Table

- Each table contains regional employment data by industry for 2008 and 2012.
- Regional industry employment growth and concentration is compared to national numbers.
- The color coded bars indicate the five industries with the highest levels of employment in 2012.

- Negative numbers indicate that job growth in the regional industry has not performed as well as the industry has at the national level.
- Positive numbers indicate job growth in the regional industry that has out performed the industry at the national level.
- Green arrows indicate relative growth greater than 5%. Yellow arrows indicate relative change of less than 5%. Red arrows indicate relative contraction of more than 5%.

➤ Location Quotient is the ratio between the regional economy and the U.S. It is calculated to determine whether the regional economy has a greater share of an industry than expected.

➤ Values less than one indicate an industry is not meeting the local demand for the goods or services of that industry.

➤ Values greater than one indicate an industry provides enough goods and services to meet local demand and excess production is consumed outside the region.

➤ Values greater than 1.20 indicate an industry of specialization in the region.
